Canary Bird. Vigorous plants having 12 to 14 non-lateral stems closely set with appealing bright canary yellow blooms.

Copper Shades. Each plant carries 12 to 16 long vigorous spikes set with magnificent blooms in varying shades of copper, ranging from coppery old gold to brilliant copper-orange.

Double Fringed Petunias

Great strides have been made within recent years in the development of double Petunias. As the production of the seed is a matter of very careful work it consequently must be expensive. Careful handling of the seed is recommended. It is the nature of the seedlings which produce the best double blooms to be somewhat tardy during their early development. Usually they appear as if they lack vigor and their foliage appears crumpled.

Rose-Pink and White. We believe this is the most beautiful of all double fringed Petunias we have ever seen. The blooms are a bright rose-pink with a broad white frill. 500 seeds \$1.25; 1000 seeds \$2.00.

Rose Queen. The double blooms measure 5 to 6 inches in diameter. They are a glorious shade of bright rose-pink. The frilling of the petals is most graceful giving the double flowers a particular charm. 500 seeds \$1.25; 1000 seeds \$2.00.

Double Fringed White "Madonna." Perfectly double, pure white finely fringed flowers. Extra select stock. 500 seeds \$1.25; 1000 seeds \$2.00.

All-Double Dwarf Giant Fringed Victorious Petunias

All-Double Carmine Queen (World Beauty). Comes 100% double, forming compact dwarf plants covered with large double blooms of a glowing rich carmine color. The flowers are exquisitely frilled at the petal edges. 500 seeds \$1.25; 1000 seeds \$2.00.

All-Double Victorious Mixture. This includes a wide range of beautiful colors. Comes 100% double. 500 seeds \$1.00; 1000 seeds \$2.00.

DREER'S SUPERB GLADIOLUS

We handle only the best varieties of Gladiolus for garden and field use, forcing, and for resale to the retail trade. Our list embraces all the popular varieties for every purpose, and the prices will be found right for No. 1 top-size bulbs, which is the only size we handle. The difference in price between top-size bulbs and second and third size does not justify taking the risk of having smaller blooms or such as do not bloom at all. Our bulbs are all thoroughly treated against thrips and we will send directions for thrips control with every shipment.

Six Popular Dahlias

Jersey's Beauty

Though every year brings us new and outstanding Dahlias there can be no doubt that some of the older kinds have not been excelled. These six have proved most dependable in various sections of the country. They have the stamina and quality that make them favorites with the public. All six varieties listed here represent free-flowering vigorous kinds with healthy constitutions. Their colors are distinct and desirable and they are offered at very nominal prices. They are leaders in the New York and Philadelphia cutflower markets.

Gallant Fox. This New Jersey Dahlia is of outstanding merit. A perfect Formal Decorative in form with six-inch flowers of a most entrancing luminous dark red color which is described by some as claret, but defies definite description. The New York and Philadelphia markets absorb the cut-flowers as fast as they can be produced.

Jane Cowl. One of the most popular both in the garden and on the exhibition table. An immense Informal Decorative of very vigorous habit. The blooms combine lovely shades of bronzy buff and old gold.

Jersey's Beauty. Probably the most popular and most satisfactory Dahlia in commerce today. A perfect Formal Decorative of a beautiful pink color.

Myrtle Fisher. This slightly Informal Decorative yellow Dahlia is one of the most reliable for cutflower purposes that goes into the Philadelphia market. The full double flowers are about six inches in diameter and produced freely on sturdy healthy plants.

Boycroft. A Semi-Cactus of perfect form producing six to seven inch flowers in great profusion. Of a deep orange terra cotta color suffused with rose.

Snowboy. White Formal Decorative with perfect deep flowers, five to six inches in diameter.

We offer these in strong tubers only:
\$1.50 per doz.; \$10.00 per 100.

New Dwarf Dahlias for Forcing and the Garden

This new race of which the variety "Easter Greeting", introduced last year, is the forerunner, promises to create quite a sensation.

Last season we potted up a quantity of root divisions of the different varieties in January and they were in bloom in March in 6-inch pots in such attractive condition that they would have sold in quantities if available.

Aside from their usefulness to the greenhouse man in this way they have demonstrated their adaptability for garden ornamentation this summer.

Compact plants not over two feet high and just as wide are covered with flowers from early summer until frost.

If dug in the fall and divided in the usual manner each division will make a fine six-inch pot plant if potted in midwinter and grown on in a moderate temperature.

Christine. Dainty pure white flowers of small size. Blooms profusely.

Easter Greeting. White flowers somewhat larger and of better form than Christine but not as early. Ready in May. 3-inch pots 25c each; \$2.50 per doz.; \$20.00 per 100.

Elsie. Deep golden yellow at center, passing to rich orange-carmine toward the tips of the petals. The flower is of good size and excellent Semi-Cactus form. Free and vigorous.

Gertrude. Clean sulphur yellow. Good size. Very compact.

Kate. Showy bright orange-scarlet flowers of formal contour.

Rosalie. Lilac-rose, paler toward the center. Attractive and useful both in pots and in the garden.

Ursula. An intense crimson Informal Decorative with carmine reverse. Flowers comparatively large.

Any of the above, except where quoted, strong 3-inch pot plants ready in May: 60c each; \$6.50 per doz.; \$50.00 per 100.

DREER'S SELECT Hardy Perennial Plants

Specially Grown in Pots for Outdoor Planting

The majority of the stock offered is pot grown. This does not mean that the plants have been altogether pot grown but that they have been field grown, dug, and potted up during the fall months. Such stock can be planted even late in the spring with practically no loss, whereas clumps seldom do well when planted late in the season. Our experience has been that a vigorous pot plant of proper size will, in nearly every case, give quicker and better results than the best so-called "field clumps."

**Hardy Garden Chrysanthemums
The World's Best Collection**

2-inch pots—Ready in March

For a quarter century we have been selecting and producing new varieties of Garden Chrysanthemums, constantly endeavoring to increase their desirability and usefulness for outdoor use. As newer, better, and harder varieties appear, we are obliged to discard many old favorites. You may rest assured that the newer ones selected in the same colors have qualities of superiority justifying their trial and adoption by you. We were particularly successful in creating a fine lot of wonderfully superior varieties having Koreanum as one of the dominating strains. The increased hardiness of these has been demonstrated. In the 1936 set of ten offered below, we succeeded in producing larger flowers with a greatly enhanced range of colors. In addition, the varieties in this set bloom from one to three weeks earlier than Korean crosses heretofore offered. They will have passed their prime before injury from severe frost occurs.

U. S. Plant Patent No. 110

A very desirable new Barberry which makes a beautiful upright growth that gives it exceptional value for semi-formal hedges. The fall coloring of Columberry also is richer and deeper than that of the common Barberry. Trimmed into hedge it gives a particularly fine effect. Its hardness and immutability to rust makes it as desirable for northern sections as in warmer climates. Fruits remain on the plant for a long time.

Buddleia—Butterfly Shrub,

Summer Lilac

Ile de France

This fine Buddleia, a French introduction, has quickly replaced the older varieties of this shrub which have been popular for so many years, because it is superior, not only in its brilliant coloring but the flower spikes are longer and more graceful. The plants also are of a better, more uniform shape.

The plant attains a height of from 3 to 4 feet, forming a symmetrical, bushy shrub. Every branch is terminated by a graceful, cylindrical spike 6 to 9 inches long. The fragrant flowers are brilliant rosy violet-purple. In bloom from the latter part of July to late in September.

3-inch pots, \$2.50 per doz.; \$15.00 per 100.

Corchorus—Kerria, Globeflower

Japonicus fl. pl. This is a particularly valuable shrub because it combines many showy features. The habit of the plant is most graceful and the light green serrated leaves add much to its beauty. From June to October the bushes are covered with attractive, double, golden yellow flowers which are unlike those of any other shrubs. But even during the winter the bright green stems add a distinctive note to the garden. The plants grow about 6 feet high. Field plants \$3.50 per doz.; \$25.00 per 100.

The dwarfier varieties are nearly evergreen and while especially adapted for rocky plantings are equally effective planted in clumps in front of the shrubby border or mixed with the dwarfier broad-leaved evergreens.

Francheti. Tall, upright, densely branched shrub with spreading branches. Fruit orange-red; semi-evergreen.

Horizontalis. A low-growing shrub with almost horizontal branches. Small shiny green leaves and orange-red berries produced in great quantity. One of the most effective evergreen plants for rocky or border planting.

The entire bush, flowers and foliage, is sweetly scented. In addition to being very conspicuous in the landscape the plant also is outstanding for cutting and deserving of much more attention than ordinary plant material. We highly recommend this for cut flower purposes or for landscape planting. Strong field-grown plants 35c each; \$3.50 per doz.; \$25.00 per 100.

Erica—Heath

Most of these Heaths are compact, low-growing, and extremely useful for rockeries. The small foliage is densely arranged around the wiry stems, and both in full bloom or in mid-winter they make a very pretty picture. Give some protection the first winter to acclimate them. Semi-shady location.

A very handsome small shrub, hardy as far north as Philadelphia. It grows about three feet high and has graceful, light green foliage which turns to a most attractive bronzy red early in the fall. The small white flowers are produced in good-sized erect panicles in spring and they are followed by crimson berries. Strong 5-inch pots, 50c each; \$5.00 per doz.

Osmanthus—Holly Osmanthus

Aquifolium. A beautiful, strong growing, Holly-like shrub with evergreen dark green, shiny, crinkly, spiny-toothed foliage. Attractive not only in summer but throughout the winter. Golden Variegated California Privet

Three-year-old bushy plants, 18 to 24 inches high, \$3.00 per doz.; \$20.00 per 100.

Pyracantha (Crataegus) coccinea Lalandi Firethorn, Evergreen Thorn

There is no other fruiting evergreen shrub that is so attractive throughout the year as this Firethorn. It will succeed in any fairly sunny position, developing into a shapely plant 6 feet or more high. May be planted either in connection with other shrubs, as a single specimen, or may be trained with wonderful effect against a wall. Its large trusses of white flowers are followed in summer by an abundance of brilliant orange-scarlet berries, which, remaining on the plants throughout the winter, produce a gorgeous effect. Strong pot-grown plants 15 inches high, 75c each.

Viburnum Carlesi—Fragrant Viburnum

A rare Korean variety which is entirely distinct. Has sweet-scented salver-shaped flowers of a delicate rose-tinted white, passing to white. The flowers are produced in May in terminal subglobose cymes 2 to 3 inches in diameter. Good bushy specimens 2 feet high, 75c each.

Viburnum rhytidophyllum

A rare variety, particularly attractive on account of its large, dark green, nearly evergreen foliage. The yellowish white flowers are followed in September by red berries which finally turn black. 4-inch pots, 50c each.

Vitex macrophylla—The Rare Chaste Tree

In general habit similar to *V. Agnus-castus* but much stronger in all parts, the foliage being larger while the trusses of rich lavender-blue flowers are fully double the size. It blooms from July until frost, and is likely to become as popular as the Butterfly Shrub. Field-grown plants, two-year-old, \$3.50 per doz.; \$25.00 per 100.

Plant Department

Garden, Greenhouse, and Decorative Plants

The Dreer plant department is a very important and extensive division of our business. We doubt that there is any other commercial grower in this country who produces so many different species and varieties for florists' use. Those who have visited our greenhouses at Riverton, N. J., or have bought plants from Dreer, know well the quality of the stock we supply. May we extend to you and your associates a cordial invitation to take the first opportunity to visit our Riverton establishment in order to see for yourself the beautiful stock of plants offered on these pages. You will find a visit to the Riverton greenhouses not only most enjoyable but also highly educational. Besides the greenhouses, however, there are many other features that will interest the commercial florist. No matter what time of the year you come there always are many things worth while seeing.
